

Publication and Dissemination of Research procedure

Section 1 - Preamble

(1) This Procedure is effective from 21 September 2016.

Section 2 - Purpose

(2) This Procedure outlines the requirements for publication and dissemination of research conducted, according to the [Australian Code for the Responsible Conduct of Research, 2018](#) (the Code).

Section 3 - Scope

(3) This Procedure applies to all research undertaken by staff and students of the University.

Section 4 - Policy

(4) This Procedure is pursuant to the [Research Conduct policy](#).

Section 5 - Procedure

(5) The University acknowledges the importance of research being communicated to other researchers, professional practitioners and the wider community. Researchers have a responsibility to disseminate and publish research outcomes broadly to pass on the benefits to other researchers, professional practitioners and the wider community.

(6) Before disseminating research findings, researchers will develop a publication strategy and adhere to any confidentiality, privacy, contractual or funding restrictions, including those concerning intellectual property.

(7) Where possible, research findings should be peer reviewed by impartial and independent assessors in the same or a related field.

(8) If the research is considered 'dual use of research of concern' or relates to research on the [Defence and Strategic Goods List \(DSGL\)](#), it should only be disseminated in accordance with the requirements of [Defence Trade Controls Act \(Cwth\) 2012](#) and with the advice of [Defence Export Control](#).

Accurate and proper reporting of research findings

(9) Researchers will take all reasonable steps to ensure that disseminated research is accurate and properly reported by:

- a. citing work appropriately and accurately according to the [Research Authorship procedure](#)

- b. including information on all sources of financial and in-kind support for the research
- c. disclosing any potential, perceived or actual conflict of interests
- d. acknowledging institutions which have hosted the research, funding bodies, partner institutions and sponsors
- e. registering all clinical trials with a recognised register in order to promote access to such information
- f. ensuring complete results, including negative findings, are reported
- g. correcting the record and [Deakin Research Online](#) in relation to misleading or inaccurate statements in their research within three working days
- h. where feasible, provide research participants with an appropriate summary of the research findings in accordance with the approved ethics application
- i. correctly affiliating a University-authored publication to "Deakin University, Geelong, Australia" followed by School, Faculty, Centre and/or Institute, as appropriate.

Multiple submissions of research findings

(10) Publication of multiple papers based on the same set(s) or subset(s) of data is not acceptable except where there is full cross-referencing within the papers (for example, in a series of closely related work, or where a complete work grew out of a preliminary publication and this is fully acknowledged).

(11) If significantly similar work is presented to more than one publisher, this must be disclosed to the publisher at the time of submission.

(12) Researchers must abide by copyright and obtain permission from the original publisher before republishing research findings.

Communicating research in the public arena

(13) In discussing the outcomes of a research project in a public arena, special care should be taken to explain the status of the project (for example, whether it is still in progress or has been finalised).

(14) Researchers should only discuss research findings in the public arena after the findings have been tested through peer review, except in the case of contracted research where no peer reviewers have involvement.

Reporting of research publications and open public access

(15) All research publications will be reported by the researcher to the University for the purposes of the assessment and display of research output in accordance with University and external procedures outlined on the [Deakin Research website](#).

(16) All refereed publications by University researchers in conferences, journals and books will be deposited in the [Deakin Research Online](#) repository and in so doing researchers agree to the terms and conditions of the [Deakin Research Online Deposit Agreement](#).

(17) All research publications will be made available to anyone on the web, except where this is restricted by copyright law, publisher policy or embargo. If researchers wish material to not be made publicly available they must gain written permission from the Deputy Vice-Chancellor Research for it to be confidential.

Academic integrity

(18) Researchers will acknowledge authorship of, and contributions to, ideas in any publication, dissemination or assessment task.

Section 6 - Definitions

(19) For the purpose of this Procedure:

- a. dual use of research of concern: where research can have alternative applications with negative implications for public health and safety or national security.

Status and Details

Status	Current
Effective Date	21st September 2016
Review Date	13th September 2019
Approval Authority	Academic Board
Approval Date	13th September 2016
Expiry Date	To Be Advised
Responsible Executive	Julie Owens Deputy Vice-Chancellor Research +61 3 522 73486
Implementation Officer	Matthew Clarke Pro Vice-Chancellor Researcher Development +61 3 924 43979
